

JOB TITLE: Java Developer
REPORTS TO: Director of Operations, Zergo Americas
LOCATION: Arlington, VA or Charlotte, NC

PURPOSE OF THE ROLE

Working in a team of technical, creative, strategy, and product professionals, this position is responsible for developing and enhancing our enterprise-grade mobile platforms, web applications, and key client projects.

THE CANDIDATE

You understand how to build scalable systems for complex applications and make sure they all talk to each other in a way that is seamless, secure, and reliable. You are interested in working with a small and nimble team on high volume, high throughput, enterprise-grade applications that reach consumers around the world. Zergo is looking for a web application developer who understands application development, database optimization, and network routing.

KEY RESPONSIBILITIES

- Enhance our existing software platforms to be more effective, efficient, and scalable
- Work directly with product managers to help conceptualize, architect, and develop new product offerings
- Work directly with project managers to implement specific enterprise client work (i.e. platform add-ons, custom flow scripts, etc.)
- Dig directly into our data to better understand how our users engage and interact with our platforms in the mobile space
- Collaborate with system administrators to aid in capacity planning, architecture management, and network monitoring and analysis

SKILLS AND EXPERIENCE

- BS or MS in Computer Science or related field
- 5+ years experience building high performance, robust products for fast growing web or mobile enterprise products
- Strong experience programming in Java with technologies such as Spring, Hibernate, JDBC, Maven, Tomcat, and JBoss
- Experience with SQL, specifically MySQL in a clustered environment
- Comfortable with AJAX-based web development (including JavaScript and jQuery)
- Comfortable in a small, intense, and high growth startup-like environment and willingness to be completely self-driven and motivated
